Chapter 1

Analysis

1.1 Frequency

1.1.1 one letter word

o:2

1.1.2 two letter word

```
au: 1 ck: 6 cm: 1 cs: 1 hm: 3 hs: 10 kh: 8 lu: 6 mh: 1 ok: 8 oz: 6 qy: 1 tu: 1 wg: 1 wv: 2 zh: 1
```

1.1.3 three letter word

```
aon : 2 aqk : 4 dom : 1 eoj : 1 ghq : 1 hej : 1 hmu : 1 hqv : 1 khh : 1 klu : 15 lcw : 3 lcz : 10 loj : 7 mhk : 2 mht : 1 omj : 18 onu : 1 shv : 3 sov : 1 toz : 11 umj : 1 zog : 1
```

1.1.4 only one letter word o=?

sentence 1 : klu vcdluz lu loj avhqnlk aodr svhw lcz kvopu
ez loj mht audhwu $\underline{\mathbf{o}}$ ehdoe eunumj

sentence 2: kluvu tuvu zhwu klok zlhhr klucv luojz omj klhqnlk klcz toz khh wqdl hs \underline{o} nhhj klcmn; ck zuuwuj qmsocv klok omghmu zlhqej yhzzuzz

So 'o' can be a/i...but usually i doesn't sit in middle of simple sentence..even if i sits in the middle, then the sentence will be complex or compound..in this case there is no preceding comma(,) or conjunction(at least 3 character word, but here is hs(2 characters in 2nd senntence)) in the above sentence

$$mapper: \mathbf{o} = \mathbf{a} \tag{1.1}$$

1.1.5 most frequent three letter word omj(18times)=?

We already know $\mathbf{o} = \mathbf{a} \dots$

So omj = amj

From knowledge section most frequent three letter word 0.1.4 we know that and start with a

we can guess (90%) that $\mathbf{omj} = \mathbf{and}$ then

$$mapper: \mathbf{m} = \mathbf{n} \tag{1.2}$$

$$mapper: \mathbf{j} = \mathbf{d} \tag{1.3}$$

1.1.6 second most frequent three letter word klu(15times)=?

We can also guess that $\mathbf{klu} = \mathbf{the}$. If we map this time we can be sure about our guess..

$$mapper: \mathbf{k} = \mathbf{t} \tag{1.4}$$

$$mapper: \mathbf{l} = \mathbf{h} \tag{1.5}$$

$$mapper: \mathbf{u} = \mathbf{e} \tag{1.6}$$

In the last line : ok **klok** kcwu svhjh toz zkcee cm lcz ktuumz $\mathbf{klok} = \mathbf{that}$

1.1.7 2nd most frequent 2 letter word kh=?

we already know $\mathbf{k} = \mathbf{t}$ there is also three letter word $\mathbf{k}\mathbf{h}\mathbf{h}$

from knowledge two letter section 0.1.3 we can easily find out that

$$mapper: \mathbf{h} = \mathbf{o} \tag{1.7}$$

1.1.8 ck=?

we already know $\mathbf{k} = \mathbf{t}$ So $\mathbf{c} = \mathbf{i}$ because $\mathbf{c}! = \mathbf{a}$

$$mapper: \mathbf{c} = \mathbf{i} \tag{1.8}$$

1.1.9 first word aceah=? of the paragraph

starting sentence: aceah toz puvg vcdl omj puvg yudqecov, omj loj auum klu

Using our mapper value if we try to translate the underlined words ..

omj loj auum klu=,and had (b/s)een the

as there is a comma(,) before **and** there is more possiblity for 'b'.. but we also use try both 'b' and 's'

however using 'a'='b' ...

$$aceah = bi?bo (1.9)$$

Then we if we google search ${\bf 5}$ letter word end with ${\bf bo}$ and click on this link

https://www.thefreedictionary.com/words-that-end-in-bo we will see ..

5-letter words that end in bo

turbo	combo	jumbo
limbo	bimbo	mam <mark>bo</mark>
dumbo	gum <mark>bo</mark>	carbo
bilbo	ado <mark>bo</mark>	lesbo
yob <mark>bo</mark>	sambo	gom <mark>bo</mark>

And we match with our bi?bo then we can easily match with bi?bo = bilbo

$$bi?bo=bilbo (1.10)$$

So now if search about bilbo we can know that bilbo(Bilbo Baggins) is lead character of hobbit

this link show some similarity with our encrypted paragraph.. http://www.henneth-annun.net/bios $_view.cfm?scid = 11$

1.2 Decrypted paragraph

bilbo was very rich and very peculiar, and had been the wonder of the shire for sixty years, ever since his remarkable disappearance and unexpected return. the riches he had brought back from his travels had now become a local legend, and it was popularly believed, whatever the old folk might say, that the hill at bag end was full of tunnels stuffed with treasure. and if that was not enough for fame, there was also his prolonged vigour to marvel at. time wore on, but it seemed to have little effect on mr. baggins. at ninety he was much the same as at fifty. at ninety-nine they began to call him well-preserved; but unchanged would have been nearer the mark. there were some that shook their heads and thought this was too much of a good thing; it seemed unfair that anyone should possess (apparently) perpetual youth as well as (reputedly) inexhaustible wealth. it will have to be paid for, they said. it isn't natural, and trouble will come of it! but so far trouble had not come; and as mr. baggins was generous with his money, most people were willing to forgive him his oddities and his good fortune. he remained on visiting terms with his relatives (except, of course, the sackvillebagginses), and he had many devoted admirers among the hobbits of poor and unimportant families. but he had no close friends, until some of his younger cousins began to grow up. the eldest of these, and bilbo's favourite, was young frod baggins. when bilbo was ninety-nine he adopted frodo as his heir, and brought him to live at bag end; and the hopes of the sackville-bagginses were finally dashed. bilbo and frodo happened to have the same birthday, september 22nd. you had better come and live here, frodo my lad, said bilbo one day; and then we can celebrate our birthday-parties comfortably together. at that time frodo was still in his tweens, as the hobbits called the irresponsible twenties between childhood and coming of age at thirty-three
